New Web Site

A lot of thought has gone into Waterlife's new web site, giving end users access to a wealth of information. The site has been made clear and concise, making it easy to navigate. It is believed that Waterlife (at the time of launch in '93) pioneered the online disease diagnosis system, making it simpler for fish keepers to identify illnesses. Waterlife's web site also allows you to locate your nearest aquatic store in which to find our products. To view this and the rest of the Waterlife range, go to waterlife.co.uk

Fish keeping guides

Other helpful information online or by request are the ever popular fish keeping guides, which describe in easy to follow terms how to look after your marine, tropical freshwater, indoor goldfish aquarium or garden pond.

Packaging

Waterlife packaging has never been easier to use. The labels clearly identify product use, instructions are comprehensive and simple to follow. The range also utilises a measuring cup, making the correct volume of product easy to administer.

QR Codes

For people with smart phones, Waterlife has kept up with current trends by adding QR codes to product labels and boxes, which lead to Waterlife's web site.

POS

To assist with in store selection, Waterlife produce a range of point of sale material, including: disease charts, fish keeping guides, shelf wobblers and posters.

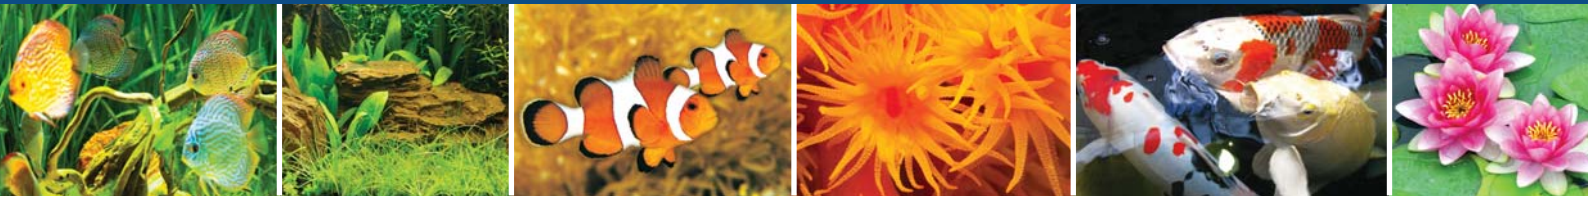

Advertising

Waterlife maintains a national advertising campaign as well as writing editorial to keep both consumers and the trade up to date with developments and products.

Email advice

Waterlife operate an email advice line Monday to Friday. (excl. Bank Holidays, Christmas & New Year)
info@waterlife.co.uk

index freshwater marine pond reptile

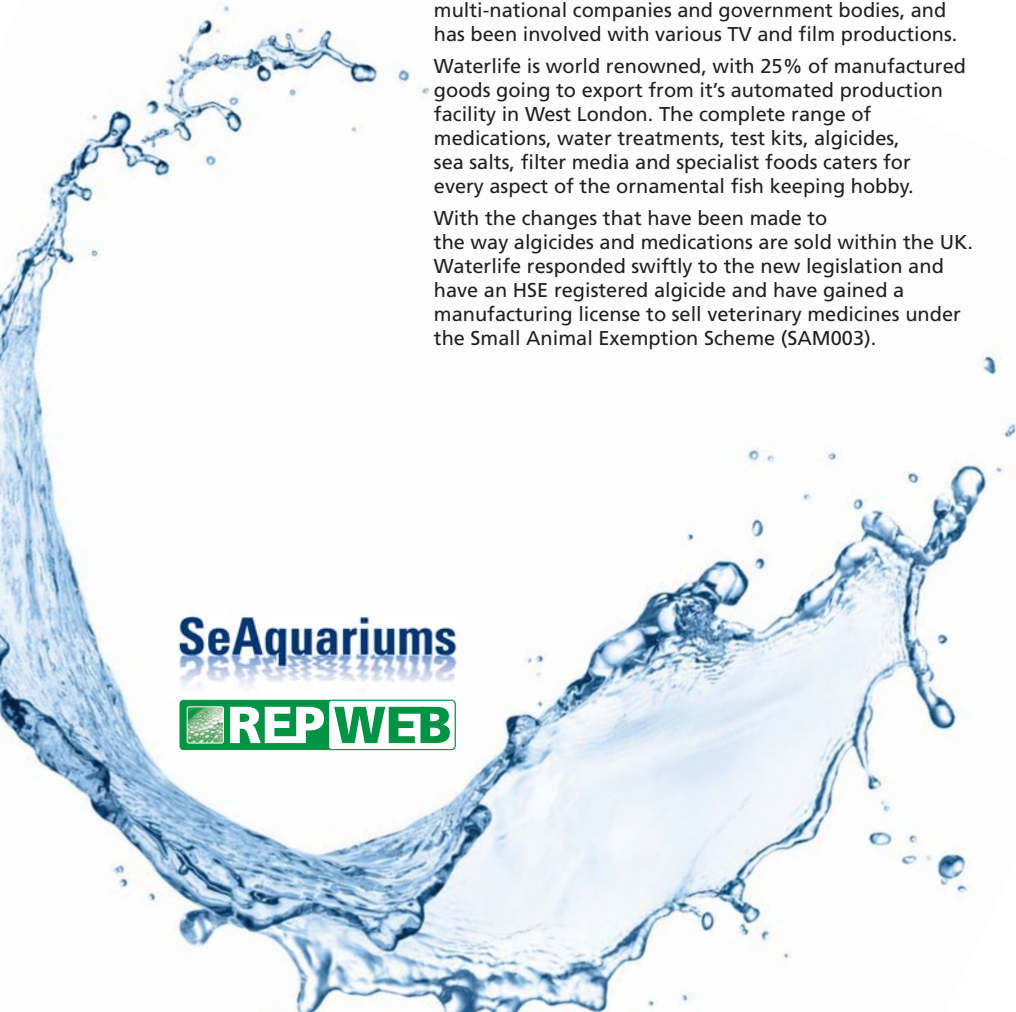

Waterlife Research Ind. Ltd. is probably best known to the pet trade for its impressive range of aquarium and pond products.

Graham Cox founded Waterlife in 1968. His interest in aquatics first arose whilst he was teaching biology and chemistry in Zambia. Whilst on holiday in Mozambique he swam and dived in the coral reefs and was so excited and enthusiastic by what he saw, he used his scientific background to form SeAquariums, now Waterlife Research. SeAquariums was one of the first aquatic businesses to specialise exclusively in the importation of tropical marine life and the manufacture of equipment required to study them.

Over the years, Waterlife has helped many businesses to get started in aquatics and has been pleased to be able to pass on knowledge to help grow the aquatic market. Such projects have included establishing fish farms and exporting stations and the setting up of public aquaria, both in the UK and overseas. In addition Waterlife has been contracted to create several aquatic exhibits for multi-national companies and government bodies, and has been involved with various TV and film productions.

Waterlife is world renowned, with 25% of manufactured goods going to export from its automated production facility in West London. The complete range of medications, water treatments, test kits, algicides, sea salts, filter media and specialist foods caters for every aspect of the ornamental fish keeping hobby.

With the changes that have been made to the way algicides and medications are sold within the UK. Waterlife responded swiftly to the new legislation and have an HSE registered algicide and have gained a manufacturing license to sell veterinary medicines under the Small Animal Exemption Scheme (SAM003).

aquarium freshwater medications

Waterlife disease treatments are famous for their effectiveness and value for money. They have been the trade's choice since 1968 and are used by many public aquariums, wholesalers, retailers and hobbyists world wide.

Always check water parameters before attempting disease control.

- Pond
- Coldwater
- Tropical Freshwater
- Brackish water
- Marine

Protozin Protozoacide & Fungicide

- For effective control of protozoan parasites e.g. Whitespot, Velvet, Costiasis and Trichodiniasis.
 - Control of fungal infections.
- NB. Do not use when rays, momyrids, crustaceans or molluscs are present.

Size	Code	Treats
100ml	929	4 day course for 250 litres / 55 Imp. Gals
250ml	952	4 day course for 625 litres / 138 Imp. Gals

Myxazin Broad Spectrum Bactericide

- Lowers the count of harmful bacteria.
 - Treats Fin Rot, Body Rot, Ulcers, Sores, Pop Eye, Cloudy Eye, Mouth Fungus and other bacterial diseases.
 - Can also be used to sterilise nets and live foods.
 - Mild on fish, highly biodegradable and effective.
- NB. For marine use – only use in fish only aquaria.

Size	Code	Treats
100ml	930	5 day course for 200 litres / 44 Imp. Gals
250ml	955	5 day course for 500 litres / 111 Imp. Gals

Nova + Parasticide & Bactericide

- Natural tea tree based formula.
 - Broad spectrum 3-in-1 fish medication.
 - Treats Trichodina, Velvet, Flukes, Fin Rot, Wounds and Fungus etc.
- NB. Caution kills snails.

This product is manufactured under licence from the Stockton Group of Companies

stk The smart way to grow.
Stockton Group

Size	Code	Treats
125ml	942	5 day course for 250 litres / 55 Imp. Gals
250ml	965	5 day course for 500 litres / 110 Imp. Gals

Parazin Parasticide

- Treats Fish Lice, Anchor Worm, Gill Maggots and other crustacean parasites / predators.
 - Only one dose usually required.
 - Only available from Waterlife.
 - Safe with fish and plants.
 - Does NOT harm filtration bacteria.
- NB. Do not use with crayfish, crabs, shrimps, lobsters or related species.

Size	Code	Treats
20 Tab	258	Up to 450 litres / 100 Imp. Gals

Sterazin Parasticide

- For the control of gill and body parasites.
 - Controls internal parasites such as Round Worm, Thread Worm and intestinal worms.
 - Can be used to assist sterilisation of aquatic plants.
- NB. Not for use with crustaceans, echinoderms, rays, seawater sharks, pirahna, sturgeon or sterlets and related species. With these species use Waterlife's Paragon.

Size	Code	Treats
100ml	935	5 day course for 200 litres / 44 Imp. Gals
250ml	954	5 day course for 500 litres / 111 Imp. Gals

Octozin

For Flagellated Protozoa

- Unique treatment for internal parasites e.g. Sleeping Sickness, Hole-in-the-Head, Seawater Angelfish and Clownfish Disease, Malawi Bloat Disease and some types of Dropsy.
- May be used to treat Whitespot in seawater aquaria where Cuprazin can't be used.
- Harmless to invertebrates and algae when used as directed.

Size	Code	Treats
21 Tab	926	3 day course for 150 litres / 33 Imp. Gals
80 Tab	956	3 day course for 600 litres / 133 Imp. Gals
200 Tab	961	3 day course for 1,500 litres / 330 Imp. Gals

aquarium freshwater additives

Extensive development and research have created one of the most comprehensive and effective tropical freshwater ranges on the market today.

- Pond
- Coldwater
- Tropical Freshwater
- Brackish water
- Marine

6.5 Buffer

Lowers pH and hardness of tap-water for acid-loving fish and plants

- A true pH buffer, which softens and acidifies tap-water for acidophilic fishes and plants.
- 6.5 BUFFER is a safe way of adjusting pH.
- pH can't fall below 6.5.
- Reduces fish waste toxicity.

Size	Code	Treats
160g	904	Use as required

7.2 Buffer

Lowers pH for community freshwater fish

- Reduces pH to 7.2 for community freshwater fish.
- Safe – will not lower the pH below 7.0.
- Easy to use powder treatment.

Size	Code	Treats
60g	915	Use as required
160g	905	Use as required
4.5kg	063	Use as required

8.3 Buffer

A blended multiple compound buffer

- Increases pH and hardness.
- Harmless to filter bacteria.
- Safe buffer formulation.
- Does not contain phosphate.
- Suitable for alkaline water loving species.

Size	Code	Treats
230g	906	Use as required

BacterLife

The natural weekly cleaning treatment

- Oxidises ammonia, nitrite and digests sludge.
- Blend of essential nitrifying and sludge-digesting bacteria.
- These helpful bacteria aid the break down of fish waste, uneaten food and plant debris.
- Increases the bacterial count of existing filtration.
- Inhibits 'new tank syndrome'.

NOW EVEN BETTER!

Size	Code	Treats
100ml	927	Up to 1,000 litres / 222 Imp. Gals
250ml	953	Up to 2,500 litres / 555 Imp. Gals
500ml	239	Up to 5,000 litres / 1,111 Imp. Gals
1litre	344	Up to 10,000 litres / 2,222 Imp. Gals

Haloex

Fast acting dechlorinator and water conditioner

- Neutralises chlorine, chloramine & fluorine.
- Binds up heavy metals.
- Reduces stress on your fish.
- Reinforcing the fish's protective mucus membrane.
- Should be used when filling your aquaria and after water changes.

Size	Code	Treats
100ml	931	Up to 1,000 litres / 222 Imp. Gals
250ml	951	Up to 2,500 litres / 555 Imp. Gals

aquarium freshwater additives

Humaquat Blackwater tonic

- Concentrated liquid pH adjuster, for acid water loving fishes and plants.
- Creates the natural tropical black-water conditions.
- Encourages spawning & increases disease resistance.
- Enhances colour and appetite.
- Encourages healthy plant growth and helps to suppress algae.

Size	Code	Treats
250ml	967	Up to 2,500 litres / 555 Imp. Gals

Paragon General tonic

- Releases monatomic oxygen in safe amounts, improving fish health, vitality and colour.
 - Raises the REDOX potential (oxygen levels) in the aquarium and improves filter efficiency.
 - Assists in the break down of fish waste and plant debris, improving aquarium conditions.
 - Easy to use powder form and does not dye silicon sealant.
- Dissolved, Paragon is even safe with delicate species – even urchins, starfish and crustaceans.
- NB. Do not use with Discus species.

Size	Code	Treats
200g	939	Up to 2,500 litres / 555 Imp. Gals

StayClear A Water clarifier

- Flocculent water clarifier.
- Suspended particles are bound together into larger clumps, which sinks allowing it to be removed from the water by filtration.
- Helps keep your aquarium clean and healthy.
- Safe with plants.

Size	Code	Treats
100ml	928	Up to 1,000 litres / 222 Imp. Gals

TropiFlora Liquid aquarium plant food

- Specially formulated to release its plant nutrients and trace elements slowly over a 10-14 day period.
- Creates controlled, healthy plant growth without intensive maintenance.
- Simple and easy to use.
- Contains potassium, which helps prevent yellowing in plant leaves.

Size	Code	Treats
100ml	937	Up to 1,000 litres / 222 Imp. Gals
250ml	957	Up to 2,500 litres / 555 Imp. Gals

Vitazin Multi vitamin supplement

- A blend of vitamins and amino acids.
- Stimulates good health, disease resistance and convalescence.
- High in vitamin B12 which combats anorexia in all fish.
- Encourages a healthy appetite.
- Shortens the recovery time after an infection.
- Does not harm filtration bacteria.

Size	Code	Treats
100ml	936	Up to 1500 litres / 333 Imp. Gals
250ml	966	Up to 3,750 litres / 833 Imp. Gals

BioMature Filtration maturation fluid

- Scientific formulation of bacterial nutrients.
- Enables filters to be matured before adding valuable fish.
- Keeps quarantine/isolation tanks mature.
- Easy to use.
- Does not harm filtration bacteria.
- Use BacterLife afterwards for rapid maturation.

Size	Code	Treats
100ml	933	Up to 3,000 litres / 667 Imp. Gals

aquarium **marine** additives

The foundations for these products are the pioneering development of the seawater hobby, by our founder Graham F Cox, in the 50's and 60's. Re-branded under the SeAquariums name, the products include re-formulations of old favourites as well as entirely new innovations. The range has been updated using the latest research and techniques and competes with the very best the rest of the world has to offer.

- Pond
- Coldwater
- Tropical Freshwater

- Marine

Coralfood

For filter feeders

- Complete diet for filter feeders such as Sponges, Tunicates, Feather-duster worms.
- CoralFood is a suspension of plankton and other marine-derived proteins, vitamins, amino acids and mineral salts.
- Can also be used as the staple diet of marine fry.
- Increases fertility of the seawater, which beneficially raises the plankton count within the aquarium.
- Fortified with Vitamin B12 and other vitamins.

• Use 3 to 4 times a week

Size	Code	Treats
250ml	960	Up to 4,800 litres / 1066 Imp. Gals

8.3 Buffer

A blended multiple compound buffer

Ultramarine

The ultimate sea salt

- Available in user-friendly, re-sealable containers.
- Made from high grade pharmaceutical ingredients.
- Contains no disease organisms, pathogens or pollutants.

- Contains essential vitamins and minerals.
- High alkaline reserve, lengthening the periods necessary between water changes.
- Produces crystal clear water after a brief period of aeration.
- Ultramarine does not require the addition of a de-chlorinator.

Cuprazin Protozoacide & Fungicide

- Effective against Whitespot, Oodinium, Benedenia, Trichodina and fungal infections
- Low-stress formulation.
- Can be used to treat all newly purchased marine fish except sharks, rays, Harlequin Tuskfish, and other related species.

NB. Cuprazin should not be used in systems containing invertebrates.

Size	Code	Treats
500ml	009	7 day course for 2,121 litres / 471 Imp. Gals
1litre	341	7 day course for 4,242 litres / 942 Imp. Gals

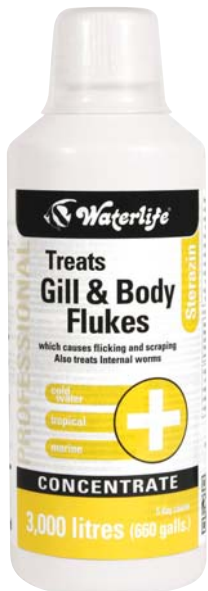

Myxazin Broad Spectrum Bactericide

- Lowers the count of harmful bacteria!
- Treats Fin Rot, Body Rot, Ulcers, Sores, Pop Eye, Cloudy Eye, Mouth Fungus and other bacterial diseases.
- Can also be used to sterilise nets and live foods.
- Mild on fish, highly biodegradable and effective.

NB. For marine use – only use in fish only aquaria.

Size	Code	Treats
500ml	010	5 day course for 3,000 litres / 667 Imp. Gals
1litre	340	5 day course for 6,000 litres / 1,334 Imp. Gals

Sterazin Parasticide

- For the control of gill and body parasites.
- Controls internal parasites such as Round Worm, Thread Worm and intestinal worms.
- Can be used to assist sterilisation of aquatic plants.

NB. Not for use with crustaceans, echinoderms, rays, seawater sharks, pirahna, sturgeon or sterlets and related species. With these species use Waterlife's Paragon.

Size	Code	Treats
500ml	008	5 day course for 2,997 litres / 660 Imp. Gals

Haloex Fast acting dechlorinator and water conditioner

- Neutralises chlorine, chloramine & fluorine.
- Binds up heavy metals.
- Reduces stress on your fish.
- Reinforcing the fish's protective mucus membrane.
- Should be used when filling your aquaria and after water changes.

Size	Code	Treats
500ml	006	Up to 22,500 litres / 5,000 Imp. Gals

pond medications

A comprehensive range of pond products for the discerning water gardener, including including Waterlife disease treatments which are famous for their effectiveness and value for money.

Always check water parameters before attempting disease control.

- Pond
- Coldwater
- Tropical Freshwater
- Brackish water
- Marine

Medizin P Protozoacide & Fungicide

- Effective treatment for Whitespot, Costia (Velvet), Trichodina, Cryptobia.
- Effective against fungal infections.
- Can be used as a preventative medicine.
- Safe with fish, plants and filtration bacteria.

Size	Code	Treats
250ml	913	3 day course for 6,000 litres / 1,333 Imp. Gals
500ml	307	3 day course for 12,000 litres / 2,666 Imp. Gals
1litre	337	3 day course for 24,000 litres / 5,300 Imp. Gals

Sterazin P Parasiticide

- For the control of Gill and Body Flukes! Stops fish flicking / itching.
- Can be used to sterilise new plants before introducing them to your pond.
- Safe with fish, plants and filtration bacteria.

Size	Code	Treats
250ml	912	5 day course for 3,600 litres / 800 Imp. Gals
500ml	219	5 day course for 7,200 litres / 1,600 Imp. Gals
1litre	342	5 day course for 14,400 litres / 3,200 Imp. Gals

Myxazin P Bactericide

- A broad spectrum bactericide for Fin Rot, Body Rot, ulcers, wounds, abrasions, sores, raised veins, blood streaks, "redness", Pop Eye, Cloudy Eye and other bacterial infections.
- Can be used as a prophylactic treatment (for disease prevention) to reduce the risk of disease, when new fish are introduced.
- Safe with fish, plants and filtration bacteria.

Size	Code	Treats
250ml	914	5 day course for 1,620 litres / 360 Imp. Gals
500ml	227	5 day course for 3,260 litres / 720 Imp. Gals
1litre	339	5 day course for 6,480 litres / 1,440 Imp. Gals

Parazin P Parasticide

- Treats Fish Lice, Anchor Worm, Gill Maggots and other crustacean parasites / predators.
- Only one dose usually required
- Only available from Waterlife.
- Safe with fish and plants.
- Does NOT harm filtration bacteria.

Size	Code	Treats
20 Tab	843	Up to 2,270 litres / 500 Imp. Gals
80 Tab	963	Up to 9,000 litres / 2,000 Imp. Gals
200 Tab	962	Up to 22,500 litres / 5,000 Imp. Gals

pond additives

Extensive development and research have created one of the most comprehensive and effective pond ranges on the market today.

- Pond
- Coldwater
- Tropical Freshwater
- Brackish water
- Marine

- Multiple bag perforations allow water and oxygen to flow freely.
- Contains no pesticides.

AlgiStraw Natural algistat

- The natural option for controlling algae in garden ponds.
- Produces natural chemicals and micro-organisms which inhibit the growth of algae.
- Effective against blanket weed and some suspended algae.
- Flat pouch and finely chopped straw gives large surface area for enhanced activity
- Active in 2-4 weeks.

Size	Code	Treats
2 Mats	265	Up to 9,000 litres / 2,000 Imp. Gals

Biomat Live Biological filter media

- A super-fine filter mat that is ideal for the extraction of floating algae and other particulates that cause green and/or cloudy water.
- Loaded with millions of bacteria to maximise biological filtration.
- Ideal for use with new and existing pond systems.

- Activates new filters & breaks down waste.
- Safe with fish and plants.

Size	Code	Treats
1 Mat	279	Up to 2,500 litres / 550 Imp. Gals

Algin G Flocculates green water

- Formulated as a fast, effective method of removing green-water in garden ponds.
- Derived from natural ingredients.
- Safe with fish, plants & filtration bacteria.

Size	Code	Treats
250ml	923	Up to 11,250 litres / 2,500 Imp. Gals
500ml	924	Up to 22,500 litres / 5,000 Imp. Gals
1litre	332	Up to 45,000 litres / 10,000 Imp. Gals

Algin P Algicide

- Rapidly resolves blanket weed problems in garden ponds.
- HSE registered algicide. No. 8052.
- Safe with fish, plants & filtration bacteria.

Size	Code	Treats
250ml	922	Up to 18,000 litres / 4,000 Imp. Gals
500ml	217	Up to 36,000 litres / 8,000 Imp. Gals
1litre	331	Up to 72,000 litres / 16,000 Imp. Gals

AlgiBlitz Clears blanket weed

- Safe to use with UVs
- Simple to use
- Does not harm filters or plants

- Usually gives excellent results within 3 weeks.

Size	Code	Treats
360g	324	3 doses for 4,500 litres / 1000 Imp. Gals

pond additives

BacterLife P

Friendly bacteria

- Reduces ammonia levels in ponds.
- Starts pond filters.
- Digests organic sludge in ponds.
- The natural weekly pond treatment.

Size	Code	Treats
250ml	352	Up to 6,750 litres / 1,500 Imp. Gals
500ml	351	Up to 13,000 litres / 3,000 Imp. Gals
1litre	345	Up to 27,000 litres / 6,000 Imp. Gals

Pond Buffer

pH adjuster

- Simple to use.
- Safe Buffer compound.
- Quickly lowers pH into the safe range.
- Will also raise the pH to 7.5.

Size	Code	Treats
360g	323	Up to 13,500 litres / 3,000 Imp. Gals

PondSal

Tonic salts

- Promotes good health, colour and vitality
- Electrolytes improve filter efficiency
- Safe with fish plants and filters.

Size	Code	Treats
10kg	067	Up to 10,000 litres / 2,000 Imp. Gals

PoolShield

Makes tap water safe to use

- Advanced, fast-acting dechlorinator and water conditioner.
- Neutralises toxins in tap-water such as chlorine, chloramine and fluorine.
- Contains the soothing properties of Aloe Vera, to protect fishes mucus coating.
- Should be used when filling up your pond & when topping up.
- Safe with fish, plants and filtration bacteria.

Size	Code	Treats
250ml	925	Up to 11,250 litres / 2,500 Imp. Gals
500ml	229	Up to 22,500 litres / 5,000 Imp. Gals
1litre	343	Up to 45,000 litres / 10,000 Imp. Gals

Vitazin

Multi vitamin supplement

- A blend of vitamins and amino acids.
- Stimulates good health, disease resistance and convalescence.
- High in vitamin B12 which combats anorexia in all fish.
- Encourages a healthy appetite.
- Shortens the recovery time after an infection.
- Does not harm filtration bacteria.

Size	Code	Treats
100ml	936	Up to 1,500 litres / 333 Imp. Gals
250ml	966	Up to 3,750 litres / 833 Imp. Gals

PondFlora

Tablet plant food

- Slow-release plant food.
- Contains iron and potassium as part of its complex formulation.
- Help sustain growth and reduces 'yellowing' of plants' leaves.
- Placed in the soil, at the root of the plant.
- No mess and easy to use.
- Balanced formula.

Size	Code	Treats
30 Tab	050	Use as required

pond test kits

Healthy water = healthy fish.
Fast, accurate, easy to use
and economical. All tests are
liquid based.

- Pond
- Coldwater
- Tropical Freshwater
- Brackish water
- Marine

Ammonia Test

- Test for toxic ammonia / ammonium.
- Hyper sensitive kit (reads from 0 to 10 mg/litre).

Test	Code	Treats
NH ₃ /NH ₄	110	50 tests per kit

Nitrite Test

- Test for toxic nitrite.
- Range covered 0 – 15 ppm.

Test	Code	Treats
NH ₂	111	75 tests per kit

Nitrate Test

- Test for toxic nitrate.
- Reads the range 0 to 200 mg/litre (ppm.).

Test	Code	Treats
NO ₃	112	50 tests per kit

Broad Range pH Test

- A wide band pH test kit for pH evaluation.
- Covers the range pH5 to pH9.

Test	Code	Treats
pH	113	75 tests per kit

disease diagnosis

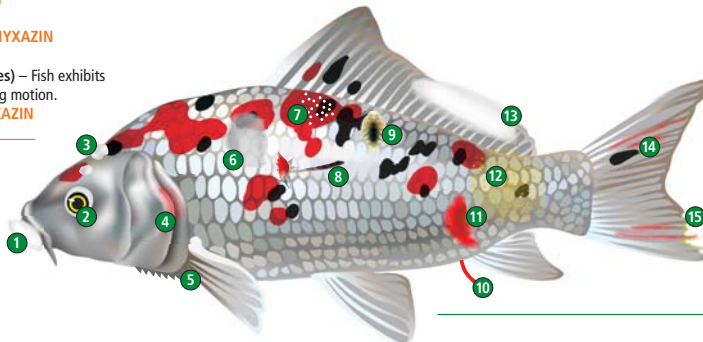

Please note – this is only intended as a quick guide.

freshwater

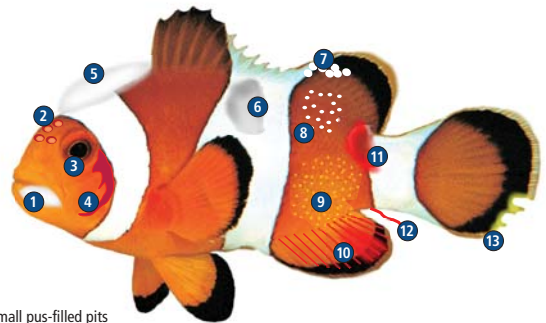

- 1 **Mouth Fungus** – Eroded mouth, whitish fungus-like growths. **MYXAZIN**
- 2 **Hole-in-the-head** (mostly on cichlids) – (small pus-filled pits over head. **OCTOZIN**)
- 3 **Cloudy Eye / Bulging Eye** **MYXAZIN & VITAZIN**
- 4 **Gill Flukes** – Inflamed gills +/- mucus trailing from gills, increased gill rate. **STERAZIN**
- 5 **Fungus** – Grey/white tufts or growths. **PROTOZIN**
- 6 **Skin Irritation (Patozoa or skin flukes)** – Areas of grey/white patchy skin +/- excess mucus production, fish flicks or rubs against objects. **PROTOZIN & STERAZIN**
- 7 **Dropsy (Protozoa or Pineapple Scales)** **OCTOZIN** at early stage of disease & **MYXAZIN**
- 8 **White Spot** – Small white spots, up to 1 mm diameter, over body and fins, +/- increased gill beat. Fish flicks or rubs against objects. **PROTOZIN**
- 9 **Anchor Worm (Lernaea)** – Worm-like, with forked tail giving overall Y or T shape. **PARAZIN**
- 10 **Lymphocystis** – Large white lumps often in groups. Carefully trim fin, dab **MYXAZIN** onto affected area to prevent secondary infections. **MYXAZIN**
- 11 **Ulcers, Sores, Wounds** – Reddened areas, sometimes deeply pitted with white necrotic tissue. **MYXAZIN**
- 12 **Intestinal Worms** – Emaciation, hollow-belly +/- red worms from vent. **STERAZIN**
- 13 **Velvet (Oodinium)** – Fine dusting of golden/grey spots over fins and body. **PROTOZIN**
- 14 **Fin Haemorrhaging** – Red streaks on fins +/- on body. Environmental: check ammonia and nitrite levels with **Waterlife Test Kits**. **MYXAZIN**
- 15 **Fin Rot** – Split or frayed fins. **MYXAZIN**

Unusual Swimming (Shimmies) – Fish exhibits a forward and backward rocking motion. **PROTOZIN & 4 days later MYXAZIN**

marine

- 1 **Mouth Fungus** – Eroded mouth, whitish fungus-like growths. **MYXAZIN**
- 2 **Hole-in-the-head** (mostly on cichlids) – (small pus-filled pits over head. **OCTOZIN**)
- 3 **Cloudy Eye / Bulging Eye** **MYXAZIN & VITAZIN**
- 4 **Gill Flukes** – Inflamed gills +/- mucus trailing from gills, increased gill rate. **STERAZIN**
- 5 **Fungus** – Grey/white tufts or growths. **CUPRAZIN**
- 6 **Skin Irritation (Patozoa or skin flukes)** – Areas of grey/white patchy skin +/- excess mucus production, fish flicks or rubs against objects. **CUPRAZIN** (fish only systems) & **STERAZIN**
- 7 **Lymphocystis** – Large white lumps often in groups. Carefully trim fin, dab **MYXAZIN** onto affected area to prevent secondary infections. **MYXAZIN**
- 8 **White Spot** – Small white spots, up to 1 mm diameter, over body and fins, +/- increased gill beat. Fish flicks or rubs against objects. **CUPRAZIN** (fish only systems) & **OCTOZIN**
